

PRESS RELEASE

FOR IMMEDIATE RELEASE

For the best fit yet, try the Invacare Storm4

Invacare is delighted to announce the launch of the new Storm4 power chair - a highly configurable and stylish wheelchair designed to satisfy the needs of the most demanding users.

A tradition of success

The first Storm wheelchair was introduced in 1996 and has since become an industry standard, leading the way in the outdoor/indoor segment. By employing the latest technologies and offering the typical Invacare combination of safety and style, the new Storm4 continues this tradition of success.

Our motto: "easy-to-deal-with"

Thanks to its modular design, many aspects of the chair can be customised to user needs. The choice of motor can be done according to dominant requirements, be it for outdoor or indoor use.

Services and maintenances are rendered trouble-free thanks to easy access to batteries and electronics. No extra parts are required for adjustments of the seat, and one tool will suffice for most modifications. The new ACS II electronics family has been enlarged and provides a seamless up-and-down gradability for different user needs.

Day-to-day manoeuvres have been made easier for both users and carers as the Storm4 features an extra-low seat height of 40 cm for easy access to tables.

All these features support the Storm4 motto; 'Easy-to-deal-with'.

Show off your sense of style!

The Storm4 offers excellent driving features and a range of cushion types, head and arm rests for a truly personalised configuration. Style-conscious users can further customise their chair with a range of coloured shrouds, different fabric coverings for the seat, back and arm rests. The tilt-in-space mechanism adds extra comfort and promotes good decubitus prophylaxis. Strong, bright LED lights not only add a contemporary, aesthetic touch but contribute to driving safety.

Stylish to look at and a pleasure to drive, this latest addition to our power chair range is certainly going down a storm!
