

Non-stackable goods for Invacare Rea AB, delivery clause Ex works:

General Instructions

To achieve efficient planning follow instructions below.

1. Use Pallet/Loadcarrier

The pallets on which you will deliver goods must be approved and preferably be:

Half-pallet (EUR6 -pallet) /

EUR-pallet (EUR2-pallet):

2. Non-Stackable EUR-Pallet: (Max height: 2200 mm, max weight incl. load: 1000 kg)

- The finished pallet must be stable and easy to handle.
- A pallet with a non-flat top is considered Non-stackable.
- If the top surface cannot be loaded, the package is counted as Non-stackable.
- A pallet that is not stackable must be marked "Not stackable".
- If you have at least 2 pcs of Non-stackable EUR-pallet, then Max height is: 2600 mm.

3. Load securing:

- The load must not stick outside the (edge/the surface) of the pallet
- Load securing must be adapted to the pallet (with eg, plastic tape / stretch film).
