

INVACARE® TOP END®
EXCELERATOR™ SERIES
HANDCYCLE

If you want a great way to exercise, cross-train or just have fun, one of the **Invacare® Top End® Excelerator™ Series Handcycles** is just what you need. This upright and extremely manoeuvrable three-wheel handcycle is capable of speeds of up to 15 mph. The smooth seven-speed Shimano® hub with its reversing drum brake delivers hands-on braking and allows the rider to tackle hills or level terrain with ease. In addition, the oval tube carbon steel frame construction with adjustable sliding seat makes transfers in and out easier. There are two great models to choose from: the stocked model can be shipped right away and the custom model allows you to choose your favourite colour and seat width.

The Top End Excelerator Handcycle offers some great options too. You can order the popular mountain drive option which adds 7 extra low gears for climbing hills or the V crankset option with its wider cranks to allow more clearance for those who are tall or require additional space. No excuses...Get Cranking!

Features

1. V Crankset

The Top End V crankset option accommodates consumers who might have "clearance" issues. Available on the Top End Custom Exceleator Handcycle.

2. Mountain Drive Transmission

Available on the Exceleator Handcycle
Adds 7 low gears (7 low + 7 standard = 14 total)
Easy shifting, especially for quadriplegics – just push-in the center button
Lightweight planetary transmission
A must have for hilly terrain
