

Alegio™ NG

Engineered for comfort

With its modern and discreet design in natural beech, white beech, light oak or cherry wood, the **Alegio_{NG}** bed from Invacare fits easily into any home care or institutional environment. Optimal comfort is achieved through a synchronised Auto Contour™ mechanism that links the backrest and knee-bend functions. This functionality is specially designed to reduce shear and friction. A feature of the **Alegio_{NG}** is the optimised adjustable height range of 28 – 80 cm. The lowest position means that shorter or more unstable users can easily and safely get up, or out of, the bed. The maximum height, at 80 cm, still ensures healthy working conditions for care staff.

Auto Contour™ mechanism

A cable provides a smooth, synchronized movement between the backrest and knee-bend for a comfortable upright position. This functionality minimises the risk of clients sliding downwards, and reduces shear and friction.

The length of the mattress sections has also been optimised in line with medical guidelines based on anthropometric statistics and pressure mapping recommendations to ensure superior patient comfort when seated, or lying back in bed.

Easy handling

A safe trolley is available as an option for the **Alegio_{NG}**, that is easy to mount and dismount. A special kit for transporting the bed in fully assembled mode is also available.

The **Alegio_{NG}** is smooth to assemble and features a quick release bracket between the base and the mattress platform. No tools are required, and there are no loose parts.

All side rails comply with the new IEC 60601-2-52 safety standard.

Features and options

Flexible length and height

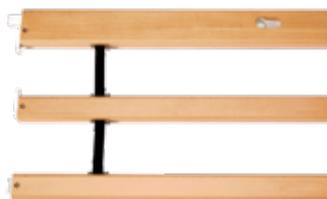

Alegio_{NG} comes with a mattress support in four sections, as standard. The bed is easy to assemble in any of the three possible modes: with a synchronised Auto Contour™ mechanism, with an electrically operated knee-bend or with a manual leg rest (no synchronised knee-bend).

As an option, **Alegio_{NG}** can be configured with auto regression for increased sitting comfort as well as length extension.

Verso II side rail

A modern, collapsible steel side rail.

Britt V full-length side rail in wood

Available in beech, cherry, white beech and light oak. Height of full-length side rails can be increased by 150 mm.

Lisa full-length side rail in cherry

Mattress support extension kit

Extends the length by an additional 15 cm.

Features and options

Auto Contour™

Electrically operated Auto Contour™ mechanism. The knee-bend is synchronised with the backrest for increased comfort when seated. Reduces shear and friction.

Fully electrically operated bed

The backrest and knee-bend can be individually (manually) activated or synchronised, depending on individual needs.

Two electrical function with manually operated leg section.

Auto-regression

Improved comfort when seated, reduced shear and friction.

Camila bed end

For Lisa full-length side rail. Available in cherry.

Sabrine bed end

Easy removable without tools, compatible with steel side rails. Available in cherry and beech.

Vibeke bed end

Easy removable. Fully compatible with steel side rails. Available in cherry.

Susanne bed end

For full-length side rails. Available in beech, white beech, light oak, cherry and a mix of beech and cherry.

Transport Trolley

For easy transport and storage.

Central Brake

Safely lock all four castors with a single foot brake.

Synchronised movement

The lower leg section operates together with the upper leg section in a fixed movement.

Quick release

For easy mounting and dismounting of mattress platform.

Features and options

Transport Trolley

For easy storage and transport.

Transport kit

Designed for use when storing and transporting the bed fully assembled.

Lifting pole

The catching handle is height and depth adjustable.

Hand controls

Select with or without lockable functions.

Technical data
