

# Propad™ Visco Overlay

High specification foam  
pressure redistributing overlay

Yes, you can.

The **Propad Visco Overlay** is composed a polyurethane cover and features a high density visco elastic (memory) foam surface with a robust foam base. This high specification surface facilitates pressure redistribution and minimises pressure on key areas of the body such as the sacral and heels.

### Comfort and Conformity

- ▶ The interior of the overlay has a top layer of high density visco elastic foam. The foam conforms to body shape, maximising the body contact area.

### High density supportive foam base

- ▶ The dual layer construction, combines a high level of comfort with improved longevity, due to the supportive, robust foam base.

### Cover

- ▶ The cover is a durable, multi stretch, water resistant and vapour-permeable cover that assists in minimising shear forces.

### Covers have an anti-slip base

- ▶ Ensures safe use of the **Propad Visco Overlay** and helps prevent slippage.

### Design

- ▶ The **ProPad Visco Overlay** has an innovative and modern cover design with the simple wave giving the mattress a fresh and current feel.

Manufactured to European Standards:  
BS EN 597-1 Cig, BS EN 597-2 Match and BS 7175 (Crib 5)

*\* Essential nursing care is pivotal in pressure ulcer prevention. This product will positively contribute to the outcome of a pressure ulcer prevention care plan. Education, clinical judgement and action based planning based on vulnerability are fundamental factors in the prevention of pressure ulcers. A range of assessment scales can be used as a formal method of assessing risk from pressure ulcer development, and should be used in conjunction with an informal assessment (informed nursing judgement). Informal assessment is considered to be of greater importance and clinical value.*
