Propad™ Premier Overlay

High specification foam pressure redistributing overlay

The **Propad Premier Overlay** is designed to sit on top of an existing conventional mattress, providing a high level of patient comfort with excellent pressure redistribution abilities. The design of the overlay along with the retaining straps enables it to fold to a quarter of its size, ensuring ease of handling and transportation.

Pressure redistribution

The foam core has larger, more supportive cells at the centre and smaller cells at each end. This enables the mattress overlay to achieve even pressure redistribution by conforming to the shape and form of the body and cradles bony prominences.

Folds down to a quarter of its length

 Facilitates easy storage and delivery. Carrying and retaining strap ensures ease of handling and transportation.

Cover helps to prevent a build up of shear and friction forces against the client

 Cover is multi stretch, water-resistant and vapour-permeable. Covers feature an anti-slip base.

Effective Pressure Ulcer Prevention

The Propad Premier Overlay has a foam core which has independent, geometrically-cut surface cells. Conforming to the shape and form of the body which increases the contact area and lowers pressure.

Design

11111

The ProPad Premier Overlay has an innovative and modern cover design with the simple wave giving the mattress a fresh and current feel.

Manufactured to European Standards: BS EN 597-1 Cig, BS EN 597-2 Match and BS 7175 (Crib 5) * Essential nursing care is pivotal in pressure ulcer prevention. This product will positively contribute to the outcome of a pressure ulcer prevention care plan. Education, clinical judgement and action based planning based on vulnerability are fundamental factors in the prevention of pressure ulcers. A range of assessment scales can be used as a formal method of assessing risk from pressure ulcer development, and should be used in conjunction with an informal assessment (informed nursing judgement). Informal assessment is considered to be of greater importance and clinical value.
