

Invacare® | FDX®

Superior performance - indoors and out

The *Invacare FDX* is an attractive, high performance power chair for the active user. The front wheel drive with *G-Trac*\* technology combines excellent manoeuvrability indoors with directional stability outdoors, whether at high speed or across uneven ground. The *FDX* comes with a configurable, flexible seat concept and is particularly easy to deal with in terms of servicing and maintenance. A slim version measuring below 600 mm width is available for largely indoor use.

# Manoeuvrability and seating comfort

The front-wheel-drive construction offers excellent manoeuvrability combined with good outdoor performance. Mobility in cramped or narrow environments is facilitated with a slim model featuring smaller tyres and measuring less than 600 mm width.

A wide array of seat options includes the *Invacare Easy-Adapt*\* seat as well as *Invacare Modulite*\* seat.

# G-Trac\* - drive as on rails

The *G-Trac* function works just like an electronic compass, providing superb tracking capabilities, no veering on slopes or instability around corners. Users feel safer and enjoy a less tiring driving experience. *ACS2* electronics means users can intuitively control the various powered options.

### Higher speed and simple servicing

The unique electronics of the *G-Trac* allows for a high speed of 10 km/h and particularly safe performance for a front wheel drive chair. The *Invacare* motto for *FDX* is "Easy to deal with", demonstrated in easily accessible electronics, batteries and motors.

# Features and options

### **Compact dimensions**

A slim <600 mm version is ideal for congested environments.

### **Central legrest**

Offers active seating position.

### **Side-mounted legrests**

Choice of manual setting or electrically elevating versions.

#### Serviceability

Easy acces to electronics and batteries makes services simple.

The **FDX** features a seat lift of 300 mm, including powered tilt function with weight shift up to 30° in combination with the  $Modulite^{TM}$  seating.

# *Modulite*™ telescopic seat frame

It is the heart of the **Modulite**™ seat design supporting a number of positioning options.

## **Side rails**

On each side mounted to telescopic bars allow for the individual placement of the armrests and the mounting of accessories.

# Sling seat option

The seat surface can easily be shaped to suit a client's posture, providing optimal comfort and support.

# Seat plate settings for width and depth

This 3-piece seat plate covers all possible width and depth settings.

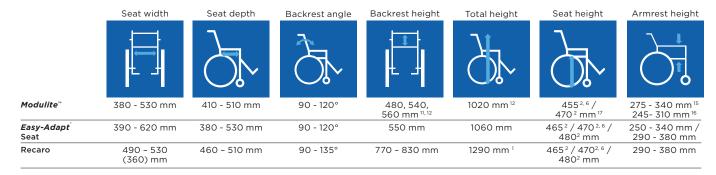

# **Modulite** seating

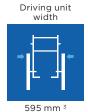

Next to the *Easy-Adapt®* the new *Modulite™* seating is offered on the FDX.
