

NEW

### Small, light, swift

The **e-fix** was designed to combine the benefits of a power and manual wheelchair for indoor and outdoor use. Any person using a manual wheelchair will draw benefits of this unique “two in one” mobility concept. The **e-fix** components can be dismantled within seconds. The small and handy components are easy to transport everywhere. The wheel integrated motors and overall discreet design make the **e-fix** an active lifestyle mobility device.

### Maximum Portability

The very low weight of the small components provides an unsurpassed transportability. The drive wheels, the battery pack and the joystick controller can be removed in seconds by means of patented quick release fasteners. Fits into the boot of the smallest car for maximum personal freedom.

### Highly manoeuvrable

Turning on the spot and tight cornering makes the **e-fix** an ideal mobility device for Indoor and Outdoor use. The highly efficient electromotors provide a long range yet batteries are kept small and lightweight. The drive wheels can be easily disengaged and the wheelchair propelled manually.

### Fits to almost any wheelchair

The **e-fix** components can be adapted to almost any manual wheelchair. Existing manual wheels may be interchangeable with the **e-fix** drive wheels allowing full manual operation of the wheelchair. The 2,4" full colour TFT graphic display

of the control unit provides easy to understand information. The crisp graphic symbols indicate battery status, maximum and current speed and other optional settings as distance-to-empty and odometer.

## Features

#### Maximum Portability

The compact and lightweight components are easy to dismantle and transport.

#### Joystick Control Unit

Full colour graphic TFT display, ultra thin housing. Including LED near-field light.

#### Lightweight components

Super lightweight battery pack weighing only 2 kg. Drive wheels starting from 7,8 kg.

#### Heavy Duty Option

Reinforced and more powerful version for clients weighing up to 160kg.

## Features

### Ultra lightweight Battery Pack

Compact dimensions, with unmatched lightness and long life time due to Lithium-Ion technology.

### One product - two applications

By the twist of hand change from power to manual mode with full freewheeling.

### Magnet plug "EasyConnex"

Self guiding plug for quick and secure connection. Ensures disconnection due to unwanted strain and hence preventing damage.

## Scope of delivery

### Joystick control unit

Programmable driving parameters, full colour TFT graphic display, near-field light, speed dial, on/off, menu and light buttons. Ultra slim design.

### Battery Pack

Extremely lightweight - only 2 kg. Very compact to accommodate even narrow wheelchair frames. Range up to 16 km on one charge. UN tested and good for air travel.

### Battery holder

Mounted to wheelchair frame. Allows quick in and out of battery with one-hand operation.

### Drive wheels

Easily attached to the wheelchair using quick-release mechanism and be removed just as easily to save space during transport.

### Automatic Battery Charger

Automatic charge and switch-off function, self guiding EasyConnex magnetic plug.

Options

Bracket set available for many different wheelchair models.

Push-handle mount for attendant joystick control.

Intuitive attendant control.

Swivel arm.

Anti-tipper with jack-up function.

Enlargement for speed dial.

Protection for control unit.

Joystick options (Special, Soft and T-Handle).

Transport bag for spare battery.

Power battery pack with 7.5 Ah providing up to 22 km range. UN tested and good for air travel.

Fixed assembly set for cross brace or cross mounting.

Extension knobs for wheel clutch available as set for one or two wheels.
