

Action[®] XT

Active and attractive

Yes, you can.™

The **Action XT** is our active addition to the successful range of **Action** wheelchairs. With its **lightweight components**, advanced camber and an extended depth, the **XT** is an **affordable, attractive, lightweight** chair. Sharing **cross compatibility** components with the other family members, the **Action XT** has a large array of features whilst remaining easy to service and refurbish: the best of both worlds!

- **Made from lightweight components for easier propulsion**
- **Proven reliability and quality as part of the Action family**
- **Easy to transport thanks to removable components**

Function meets lightweight

With its new lightweight components, the **Action XT** becomes **lighter and easier to propel**, making it suitable for the more demanding, active user. The new camber option helps to **reduce rolling resistance** and **increase the stability**.

Proven reliability

As a member of the **Action** family, the **XT** can rely on years of experience, proven product quality and it comes with the option to select from a large amount of extra options. This makes the **XT highly adaptable** and easy to refurbish.

Transportable

With its reduced overall weight the **Action XT** is light to transport. With the option to remove the legrests, armrests, siderests and rear wheels, lifting the **Action XT** becomes nearly effortless.

Features and options

Depth and angle adjustable footplate 90° footrest

The depth and angle adjustable footplate can be adjusted in angle and depth for maximum adaptation and comfort.

90° footrest

If a more active seating position is required, the overall length of the wheelchair can be shortened by using a 90° footrest.

Standard footrests

The improved design of the standard 80° footrest combines a strong and durable design, with the convenience of a swing in and out function.

Features and options

Lightweight

With a weight as low as 12,7 kg the **XT** addresses the need for improved handling, storage and transportation. The lowest transportation weight is 7,9 kg (without the legrests, armrests or sideguards and rearwheels).

Tension adjustable backrest

Provides increased comfort and increased spinal support.

Amputee support

Height, angle and depth-adjustable, the amputee support is also swingaway.

Active rear wheel position

The most active rear wheel position shortens the overall wheelbase making the chair easier to propel and manoeuvre, enabling the chair to be propelled easier. The position can be moved to make the chair more stable, for example when amputee supports are used.

Armrest range

The armrest range offers a wide range of support and comfort options.
